BUSINESS UNDERSTANDING

EazyDiner digital business model

- EazyDiner is a digital dining platform for restaurant discovery, offers and table reservations.
- It helps users find restaurants by location, cuisine, occasion, price and dining preference.
- The platform connects diners with restaurants through bookings, dining deals and payment-led offers.
- EazyDiner supports PayEazy at enabled restaurants and works with bank/card dining programs.
- Official EazyDiner pages show restaurant listings with cuisine, price, location, offers, ratings and booking CTAs.
- The current official offer ecosystem also demonstrates a discovery → booking → dine → payment journey.

eazydiner

BUSINESS OBJECTIVES

Growth Objectives

Increase website and app traffic

Increase restaurant table bookings

Improve organic Google visibility

Increase awareness of dining offers

Increase new user registrations

Engagement & Revenue Objectives

Improve repeat bookings

Increase app downloads and active users

Increase restaurant partner leads

Improve social engagement

Increase revenue from bookings, offers and partnerships

BUSINESS CHALLENGES

- Strong competition in restaurant discovery, dining offers and table booking.
- High competition for local, cuisine, occasion and 'near me' search terms.
- Users can compare restaurants, discounts and experiences across multiple platforms.
- Continuous offer communication is required because dining deals and partner offers change frequently.
- Local search visibility is critical because restaurant intent is highly location-based.
- Mobile experience must reduce friction between discovery and booking.
- Post-booking engagement is needed to encourage repeat dining and loyalty.
- Brand differentiation must balance restaurant choice, offers, convenience and trust.

eazydiner

BOOK • DINE • SAVE

SWOT ANALYSIS

Good Food. Great Experiences.

More Dining, More Smiles

1. STRENGTHS

- **Wide restaurant network** across multiple cities and dining categories.
- **Easy table booking** to discover and reserve tables online.
- **Exclusive dining offers** with discounts and membership benefits.
- **Strong brand positioning** as a complete platform for restaurant discovery, reservations and dining experiences.

2. WEAKNESSES

- **Limited market reach** in some smaller cities and towns.
- **Partner dependency** on participating restaurants for service quality and available offers.
- **High competition** from other food and restaurant discovery platforms.
- **Digital marketing challenges** to maintain consistent engagement across multiple channels.

3. OPPORTUNITY

- **Growing dining demand** for restaurant discovery and dining experiences.
- **Expand partnerships** with more restaurants, hotels and banking partners.
- **Digital marketing growth** via SEO, social media, influencer marketing and short-form videos.
- **Personalized offers** based on user preferences.

4. THREATS

- **Intense competition** from platforms like Swiggy Dineout and District.
- **Changing consumer preferences** and dining trends that evolve frequently.
- **Price sensitivity** as customers may choose platforms offering better discounts.
- **Economic uncertainty** may reduce spending on dining out and impact bookings and revenue.

The Road Ahead

By strengthening its digital presence, expanding restaurant partnerships, offering personalized deals, and improving customer engagement, EazyDiner can **attract more users** and **build long-term customer loyalty.**

Good Food Brings People Together

SEO AUDIT & GROWTH PLAN

Same audit flow as the reference project — EazyDiner-specific recommendations

OVERALL SEO AUDIT

The picture shows an overall SEO audit report of a website. It displays a C-grade overall score, with strong results in On-Page SEO (A+), Links (A+), and Performance (A+), while Usability (F) needs significant improvement. The report also highlights 5 recommendations to improve the website's overall SEO performance.

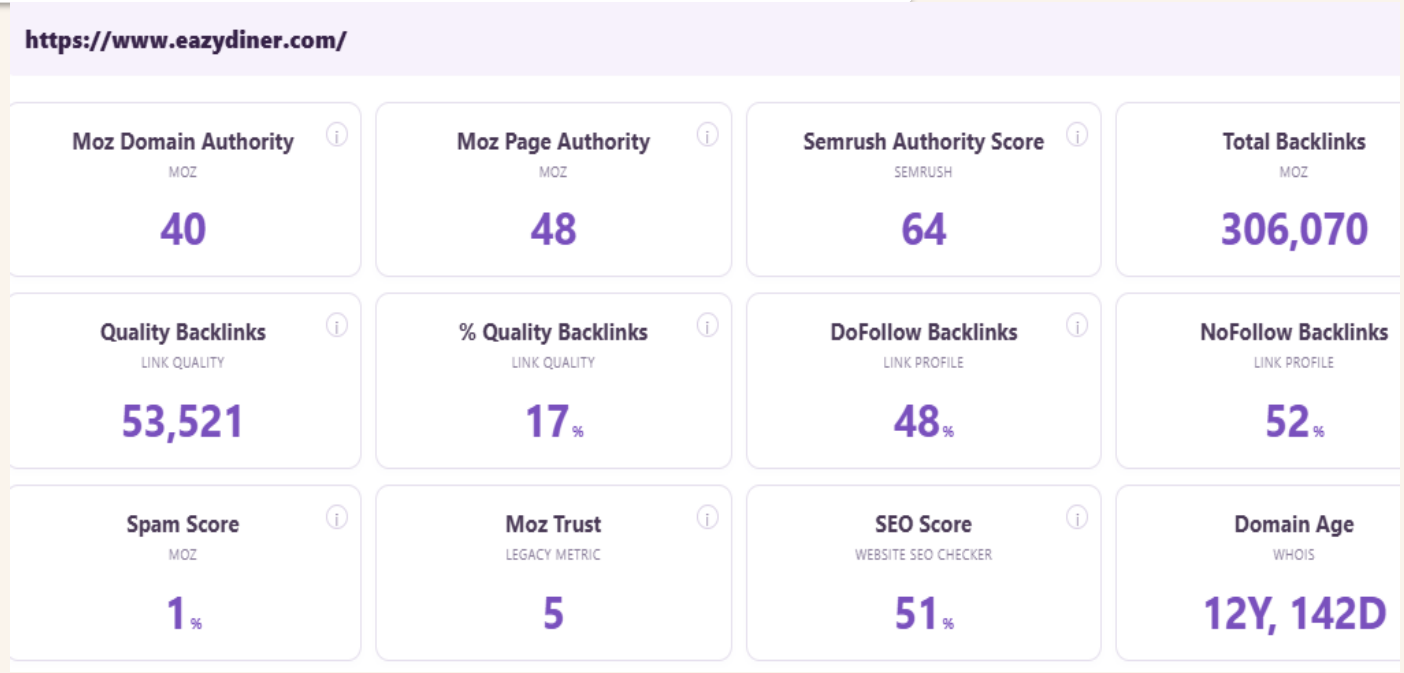

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

WEBSITE TRAFFIC ANALYSIS (1/3)

INSIGHTS
Total Visits: 4.496M visits (June–August 2026)
Monthly Change: ↓ 17.18%
Global Rank: 45,635
Country Rank (India): #3,648
Industry Rank: 345 – Restaurants & Dining
Average Visit Duration: 00:01:41
Pages per Visit: 2.52
Bounce Rate: 45.45%

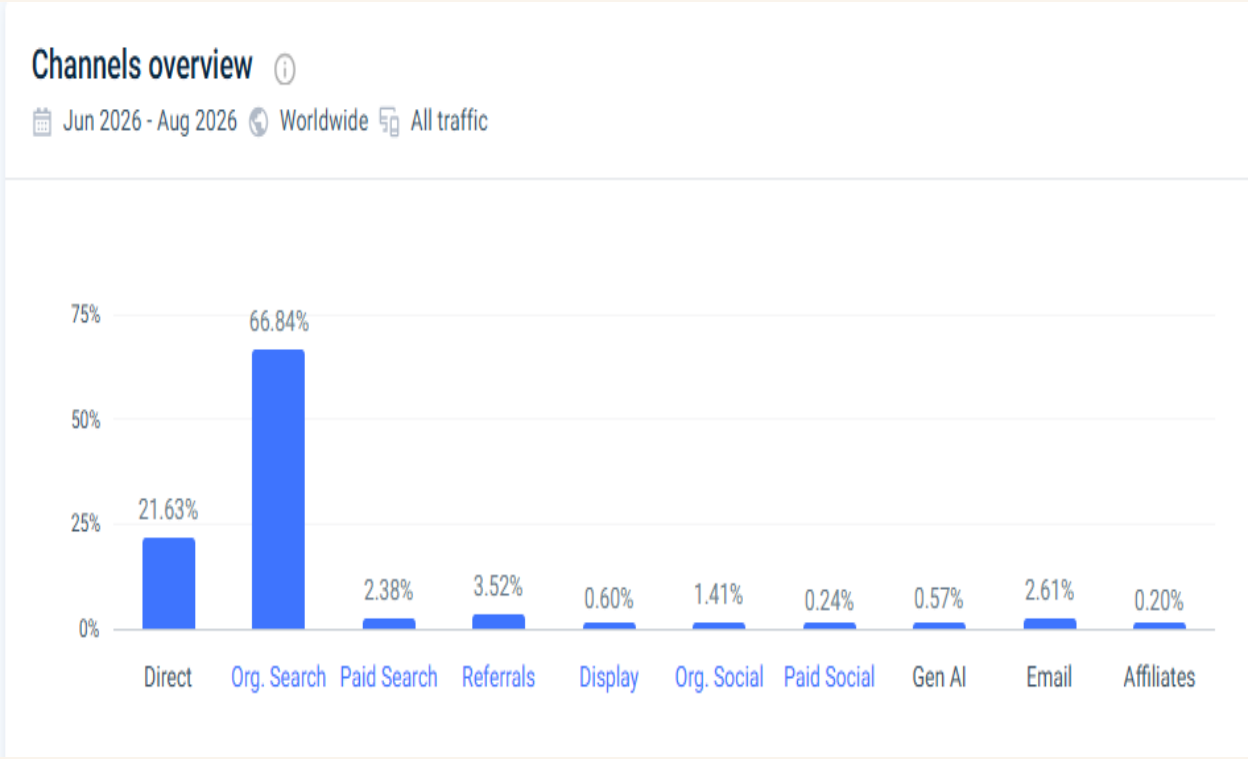

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source : Similarweb

WEBSITE TRAFFIC ANALYSIS (2/3)

EazyDiner gets most of its traffic from **Organic Search (66.84%)**, followed by **Direct traffic (21.63%)**. Other channels contribute relatively small shares, indicating an opportunity to strengthen **social media, paid campaigns, email marketing, and referral strategies**

Organic Search: 66.84%
Direct: 21.63%
Referrals: 3.52%
Paid Search: 2.38%
Email: 2.61%
Organic Social: 1.41%
Display: 0.60%
Generative AI: 0.57%
Paid Social: 0.24%
Affiliates: 0.20%

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics .
Source : Similarweb

WEBSITE TRAFFIC ANALYSIS (3/3)

EazyDiner recorded **4.496 million visits between Jun–Aug 2026**, with organic search contributing the largest share of traffic at **66.84%**, followed by direct traffic at **21.63%**. Mobile users dominated with **83.72%** of total traffic, while the bounce rate stood at **45.45%**. To improve visibility and engagement, the site should focus on stronger SEO, mobile optimization, social media promotion, and strategies to increase user engagement and pages per visit.

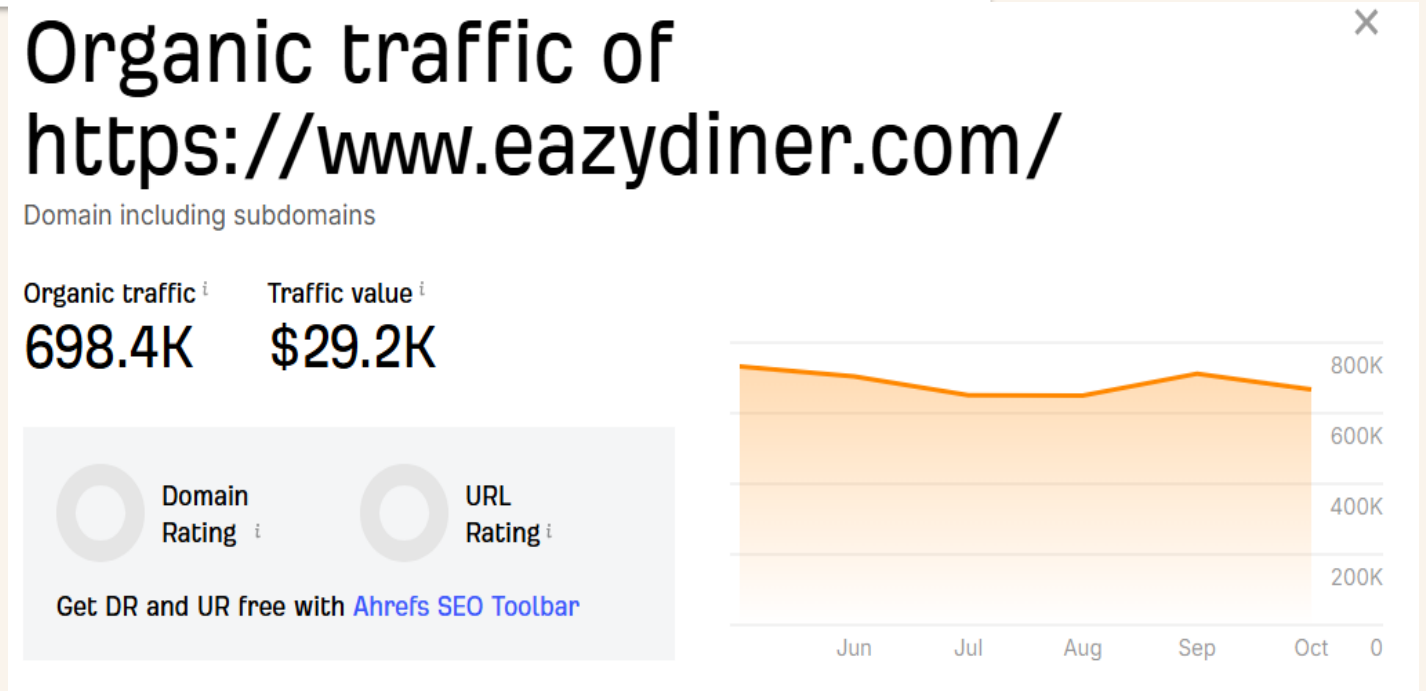

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

GEO DISTRIBUTION ANALYSIS

- Eazydiner receives the majority of its website traffic from **India (94.65%)**, making it the primary market. Other traffic comes from the **UAE (1.74%), USA (0.94%), Canada (0.24%), and UK (0.22%)**. India shows a **17.07% decline**, while the UK shows strong growth of **119.74%**.

Country	Traffic share	Change
India	94.65%	↓ 17.07%
United Arab Emirates	1.74%	↓ 33.06%
United States	0.94%	↓ 52.56%
Canada	0.24%	↓ 16.57%
United Kingdom	0.22%	↑ 119.74%

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics
Source : seoptimer

WEBSITE ORGANIC KEYWORD ANALYSIS

EazyDiner ranks **1** for the keywords **“eazydiner”** and **“thoms bakery”**, while ranking **7** for “food near me” and **6** for “restaurant near me.” The highest search volume comes from **“food near me” (152K)** and **“restaurant near me” (142K)**. These keywords generate around **31.5K traffic (5%)**, showing strong keyword visibility with further scope to improve rankings for high-volume generic searches

Top keywords India	Position	Volume
eazydiner	1	5.8K
thoms bakery	1	24K
food near me	7	152K
restaurant near me	6	142K
easydiner	1	2.8K

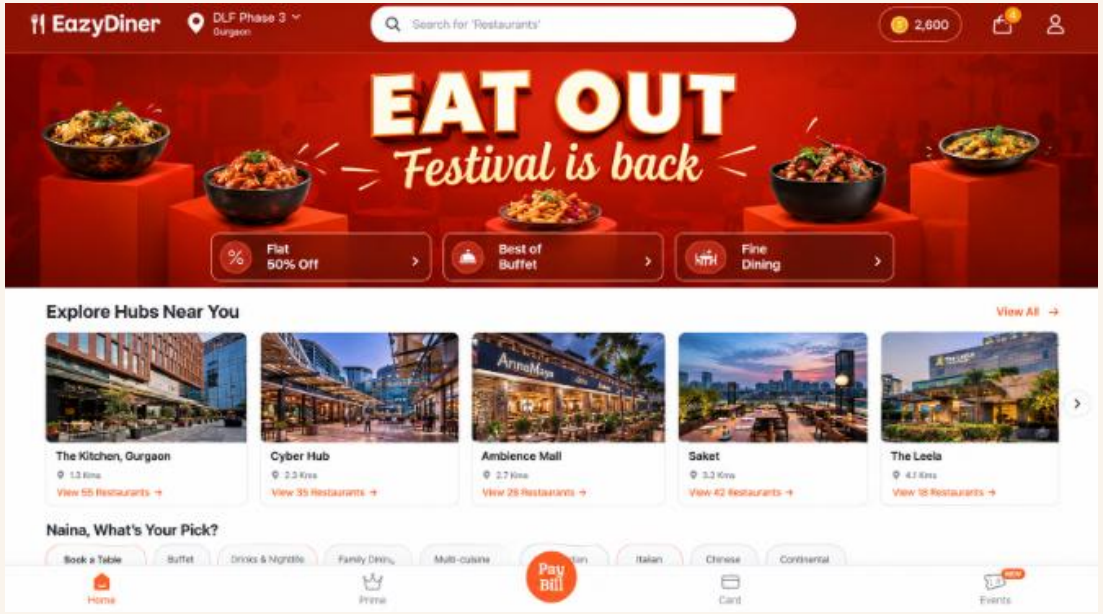

Traffic	
31.5K	5%

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

PAGE RENDERING CHECK

- The usability is fair but could be improved to deliver a smoother experience across devices. Consistency across devices is present, but certain elements (like buttons and text alignment) could be optimized further to enhance accessibility and reduce bounce rates. The preview demonstrates proper rendering on both mobile and tablet devices. However, refining responsiveness and layout can ensure a seamless experience, which is crucial since a majority of web traffic now originates from mobile users .

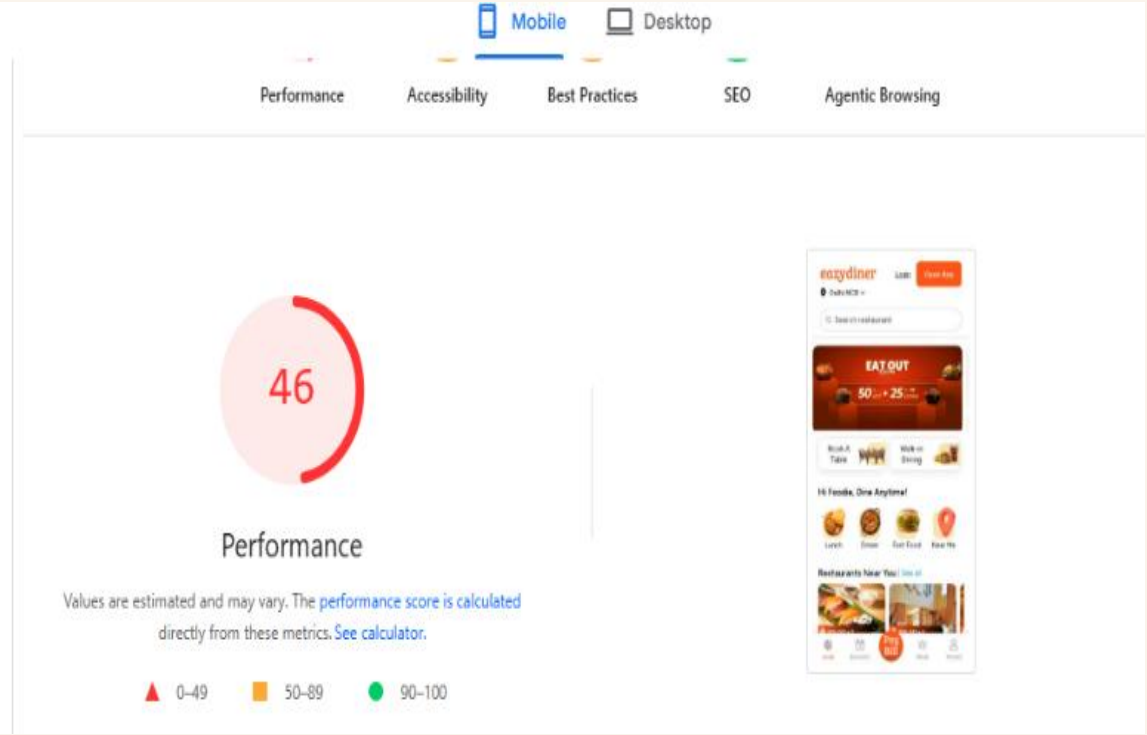

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics
Source: SEOptimer

eazydiner

PAGE SPEED CHECK – MOBILE

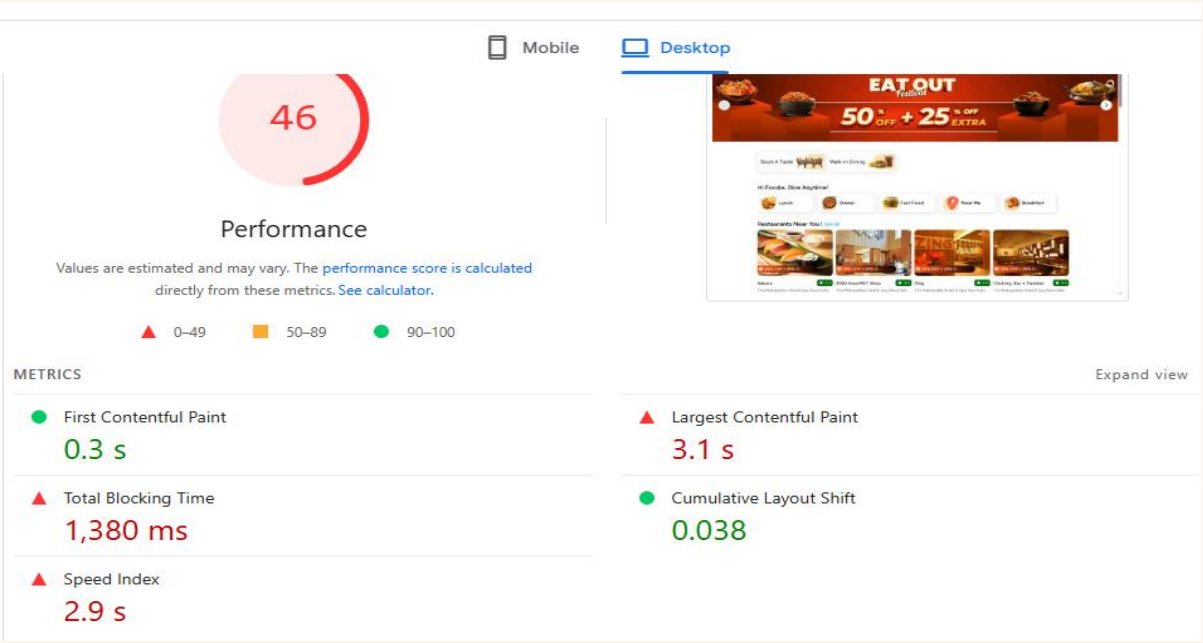

The image shows a mobile page speed performance test with a performance score of 46/100. The score falls in the low-performance range, indicating that the website needs optimization to improve loading speed, responsiveness, and overall mobile user experience.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics
Source : SEOptime

PAGE SPEED CHECK – DESKTOP

The image shows a mobile page speed performance test of a website. The website achieved a performance score of 46/100, indicating that its mobile loading speed and overall performance need improvement. Optimizing images, reducing unnecessary scripts, and improving page loading time can help enhance the website's mobile performance and user experience.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source : SEOptime

MOBILE FRIENDLINESS TEST

eazydiner

The layout adapts well on both iPhone 12 Pro and Google Pixel, with text, images, and buttons displaying correctly without overlaps or distortions.

Key interactive elements like the menu, news & updates button, and mission CTA are clearly visible and easily tappable.

The hero section image and headline text slightly overlap on some devices, which may affect readability.

The call-to-action buttons use contrasting colors, making them highly noticeable and user-friendly for mobile navigation.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source : LambdaTest

IMPROVEMENT RECOMMENDATIONS

IMPROVEMENT RECOMMENDATIONS (1/3)

- **Title Tag**

Create a 50–60 character SEO title targeting restaurant booking and dining offers.

Meta Description

Add a clear meta description highlighting restaurant discovery, table booking, deals and discounts.

H1 Heading Tag

Keep one clear H1 focused on EazyDiner's main service, such as **"Book Restaurants & Get Dining Offers"**.

Heading Hierarchy (H2–H4)

Add relevant H2–H4 subheadings for restaurants, cuisines, locations, offers and booking information.

Image Alt Attributes

Add descriptive, keyword-relevant alt text to restaurant and food images to improve image SEO and accessibility.

Overall Recommendation

Improve these on-page SEO elements to increase search visibility, user experience and organic traffic.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source: SEOptimer

eazydiner

IMPROVEMENT RECOMMENDATIONS (2/3)

Robots.txt
Create a robots.txt file to guide search engine crawlers and improve website indexing.
Canonical Tag
Add canonical tags to prevent duplicate content and consolidate SEO value.
Mobile Viewport Meta
Add a mobile viewport meta tag to ensure the website displays properly on mobile devices.
URL Structure
Maintain the current clean, lowercase and SEO-friendly URL structure.
HTTP Status Code
Fix the 403 error to ensure search engines and users can properly access the page.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source: SEOptimer

eazydiner

IMPROVEMENT RECOMMENDATIONS (3/3)

Open Graph Tags
Add Open Graph tags to improve how EazyDiner pages appear when shared on social media.
OG Image
Add an attractive OG image to create better social media previews and increase engagement.
Twitter Card Tags
Add Twitter Card tags for better link previews when pages are shared on X (Twitter).
HTML Language Attribute
Add the HTML lang attribute to help search engines understand the website language.
Hreflang Tags
Add hreflang tags if the website targets users with different language or regional versions.

Note: The data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.
Source: SEOptimer

SUGGESTIVE KEY IMPROVEMENT AREAS

eazydiner

SUGGESTED KEY IMPROVEMENT AREAS – EazyDiner

- Improve website speed and mobile performance.
- Optimize title tags, meta descriptions, H1s and keywords.
- Create useful city, cuisine and restaurant-focused content
.
- Optimize images with alt text and compression.
- Improve mobile navigation and booking experience.
- Add structured data for restaurants, reviews and FAQs.
- Strengthen local SEO for “near me” searches.
- Build quality backlinks from food and travel websites.
- Fix technical SEO issues like crawl errors and duplicate pages.
- Improve CTAs such as **Book Now** and **Get Offers**.

eazydiner

4 PILLARS OF SEO

01 • Content Creation & Enhancement

Focus on High-quality restaurant, city, cuisine and occasion content

Target relevant search intent and long-tail keywords

Update offers, guides and landing pages regularly

02 • Backlink Strategy

Earn authoritative food/travel/local links

Partner with restaurants and creators

Build a diverse, natural backlink profile

03 • CRO & User Experience

Simplify restaurant discovery and booking

Improve navigation, filters and page speed

Design mobile-first booking journeys

04 • Analytics & Optimization

Monitor traffic, rankings and conversions

Track user journey and drop-offs

Use A/B testing and data-driven improvements

SEO PLAN SUMMARY ACTIVITIES (1/2)

- **Keyword Strategy:** identify high-intent, local and long-tail opportunities.
- **On-Page SEO:** •

Optimize title tags, meta descriptions, headings, and URLs
- Target city, location, cuisine, restaurant and booking-related keywords
- Improve internal linking between restaurant, city, cuisine and blog pages
- Optimize images with relevant file names and alt text
- Create SEO-friendly restaurant and location pages

Off-Page SEO
- Build quality backlinks from food blogs and travel websites
- Collaborate with food influencers and restaurant websites
- Promote EazyDiner food guides and articles

Technical SEO: Improve website loading speed and Core Web Vitals
- Ensure mobile-friendly design
- Fix broken links and duplicate content
- Improve crawlability and XML sitemap
- Add structured data/schema for restaurants, reviews, FAQs and articles

- **Backlink Acquisition**: earn links through PR, food publications, restaurant partnerships, directories and creators.
- Google Business Profile / Local Listings: strengthen local search presence where applicable to the brand and partner locations.

SEO PLAN SUMMARY ACTIVITIES (2/2)

- **Social Media Integration:** distribute content, work with influencers and encourage UGC.
- **Performance Monitoring:** track keyword rankings, traffic sources, CTR, bookings and conversion rate.
- **Search Console**: monitor indexing, queries, CTR and page performance.
- **GA4:** build event tracking for search, restaurant views, offer clicks, booking starts and completed bookings.
- Continuous Optimization: run A/B tests and refine pages, content and campaigns using performance data.

Content SEO

- Publish blogs on trending food topics and restaurant recommendations
- Create content such as “Best Restaurants in Kolkata” and “Best Biryani in Kolkata”
- Target long-tail keywords such as “best restaurants near me” and “restaurants with offers”
- Add FAQs to target informational searches and improve topical relevance

EazyDiner already uses food-trend content and location/cuisine-focused pages, which provides a strong base for this strategy.

TARGET LOCATION

EazyDiner focuses on popular restaurant locations across major Indian cities, especially areas with a high demand for dining experiences, restaurant reservations, and exclusive food offers. The screenshot highlights key locations in Delhi, including Punjabi Bagh, Rajouri Garden, Hauz Khas Village, Aerocity, Saket, Vasant Kunj, Connaught Place (CP), and Khan Market.These locations have a variety of restaurants, from casual dining outlets and cafes to premium and fine-dining restaurants. Targeting these areas through Google Ads can help EazyDiner reach customers who are actively searching for restaurants nearby, table bookings, special dining discounts, and premium dining experiences.

eazydiner

TARGET AUDIENCE (1/2)

Segment	Need / Intent	Message
Young professionals	Weekend dining, convenience, deals	Find & book great restaurants quickly
Couples / date-night users	Ambience, premium dining, occasions	Discover date-night restaurants + offers
Families	Family-friendly restaurants	Compare options and book confidently
Food explorers	New cuisines, trending restaurants	Discover new places to eat
Celebration planners	Birthdays, anniversaries, events	Find occasion-ready restaurants + deals

eazydiner

TARGET AUDIENCE (2/2)

Segment	Need / Intent	Message
Budget-conscious diners	Discounts and dining offers	Save while dining out
Premium diners	Hotels, fine dining, curated experiences	Explore premium dining
Frequent diners	Repeat use and loyalty	Personalized recommendations + benefits
Travelers	Restaurants in new cities	Best places to eat in the city
Restaurant partners	Bookings, discovery, customer acquisition	Reach diners at high-intent moments

eazydiner

TOTAL ADDRESSABLE MARKET (FUNNEL)

TAM • Broad Market
People who dine out, search for restaurants, compare dining options, look for offers or want to reserve a table.

SAM • Serviceable Market
Users in EazyDiner-supported cities and restaurant categories who can discover, evaluate and book through the platform.

SOM • Obtainable Market
High-intent searchers, offer seekers, app users and repeat diners that can be acquired through SEO, PPC, social and CRM.

Micro Funnel
Awareness → restaurant discovery → offer/restaurant evaluation → booking → dining/payment → repeat booking → advocacy

LANDING PAGE STRUCTURE

Section	Content Idea
Hero Section	Headline: “Discover Restaurants. Get Great Offers. Book Easily.” CTA: Find a Restaurant
Popular Cities	Delhi NCR • Mumbai • Bengaluru • Kolkata • Hyderabad • Pune • Chennai
Popular Cuisines	North Indian • Chinese • Italian • Japanese • Cafe • Fine Dining
Best Offers	Restaurant + offer + rating + price + Book Now
Why EazyDiner	Discovery • offers • easy booking • payment benefits • customer support
How It Works	Search → Compare → Choose offer → Book → Dine → Pay
Social Proof	Ratings, reviews, UGC, restaurant stories and testimonials
App Promotion	“Your Dining Plans, Made Easy.” Download the app
Final CTA	Find a Restaurant / Book a Table / Explore Offers

APP MARKETING

- Positioning: “Your Dining Plans, Made Easy.”
- Promote restaurant discovery and table booking.
- Highlight dining offers and eligible payment benefits.
- Promote personalized restaurant recommendations.
- Use push notifications for relevant offers, reminders and new restaurant discovery.
- Run app-install campaigns across Google and Meta.
- Deep-link ads directly to restaurant, offer or city pages inside the app where supported.
- Measure installs → registration → restaurant view → booking → repeat booking.

REMARKETING STRATEGY

Audience	Trigger	Message
Restaurant page viewers	Viewed restaurant but did not book	Still planning dinner? Check availability
Offer viewers	Viewed an offer	Explore the offer and book
Booking abandoners	Started booking, did not finish	Complete your table reservation
Past bookers	Booked previously	Discover a new restaurant
Inactive app users	No recent booking	See what's new near you
City visitors	Viewed city/category pages	Explore top restaurants in your city

KPIs, ACCOUNTABILITY & TEAM

STRUCTURE

eazydiner

eazydiner

CONCLUSION

The strategy follows the complete reference-project flow and adapts it to EazyDiner.

- SEO + Local SEO → capture restaurant-search demand.
- Content → build city, cuisine, occasion and restaurant discovery authority.
- Google / Meta Ads → capture high-intent users and remarket to interested visitors.
- Social + Influencers → build food discovery, trust and shareable content.
- App + CRM → convert users and encourage repeat bookings.
- Analytics + CRO → continuously reduce friction from discovery to reservation.
